PASMA TRAINING

STANDARD SAFE ERECTION OF ALLOY ACCESS TOWERS

This one day course, which is held at our Head Office in Skipton, consists of a morning classroom session followed by a practical session, after lunch and back into the classroom for a written test.

1. Introduction to Mobile Access Towers
2. Tower Assembly
3. Stability
4. Safe Use of Towers
5. Repositioning Towers
6. Tower Inspection
7. Care & Maintenance
8. Tower Dismantle
9. Regulations & Standards

Each delegate must ensure they have appropriate PPE, i.e. safety boots and helmet.

It is important to ensure provision is made as to the suitability of those undertaking the training regarding the **written material, test paper and physical requirements** so as to avoid them being precluded from being considered competent to erect and dismantle a Mobile Access Tower.

The course starts at 8.30 am prompt and finishes at approximately 4.00 pm, with refreshments and lunch provided.

PASMA Certification lasts for 5 years

Maximum of 12 delegates
